

# LARAS WIJAYA

## Expert Cybersecurity Analyst

Bandung, Indonesia | Phone: 0891081594 | Email: laraswijaya@email.com

### SUMMARY

---

Highly skilled cybersecurity analyst with over 15 years of experience in developing and implementing robust security solutions. Specializes in threat detection, incident response, and security architecture design. Proficient in identifying and mitigating security risks across diverse IT environments. Demonstrates expertise in leading cybersecurity initiatives and collaborating with stakeholders to ensure the confidentiality, integrity, and availability of critical assets. Adept at staying abreast of emerging threats and technologies to enhance organizational security posture.

### EXPERIENCE

---

#### PT KEAMANAN TEKNOLOGI MAJU - Bandung, Indonesia

Senior Cybersecurity Analyst (January 2010 – Present)

- Developed and implemented security policies, standards, and procedures to mitigate risks and ensure compliance with regulatory requirements.
- Led incident response efforts, including detection, analysis, and remediation of security incidents, minimizing their impact on business operations.
- Conducted security assessments and audits to identify vulnerabilities and recommend remediation strategies.
- Provided cybersecurity training and awareness programs to educate employees on best practices and security protocols.

### EDUCATION

---

#### INSTITUT TEKNOLOGI BANDUNG (2005 - 2009)

Bachelor of Computer Science

### SKILLS

---

- Threat detection and response
- Security architecture design
- Risk assessment and management
- Incident handling and forensics
- Security policy development
- Security awareness training
- Stakeholder management

### PROJECT

---

#### Security Operations Center (SOC) Implementation (2015-2016)

- Led the design and implementation of a Security Operations Center (SOC) to enhance real-time threat detection and response capabilities.
- Integrated security monitoring tools and developed customized dashboards for SOC analysts to streamline incident response workflows.
- Established procedures for incident triage, escalation, and reporting to ensure timely and effective response to security incidents.

#### Endpoint Security Enhancement Project (2012-2013)

- Implemented advanced endpoint security solutions, including next-generation antivirus and endpoint detection and response (EDR) tools.
- Conducted endpoint security assessments and deployed security agents across all endpoints to improve threat visibility and containment capabilities.
- Enhanced endpoint security posture and reduced the risk of malware infections and data breaches.
